

## PUBLIC NOTICE

### Important information about your drinking water

#### *Monitoring Requirements Not Met*

On April 11, 2025 we became aware that our system recently failed to collect the correct number of drinking water samples. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing to correct this situation.)

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January 2025 we did not monitor or test for total coliform and therefore cannot be sure of the quality of your drinking water during that time.*

**This is not an emergency.** There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

Your public water supply is reviewing their annual monitoring schedule and verifying that they have all the materials required to sample [monthly or quarterly] per their total coliform schedule. They will reach out to MDH or their contract laboratory as needed.

*Please share this information with all other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
